THE DRAMA.

A SPECTACLE AT THE BROADWAY. "BEN-HUR."

It appears to be thought by many persons, and particularly by those persons who write novels, that the novel and the play are interchangeable and that nothing in the world is more natural and desirable than the deduction of the one from the other. There could not be a greater error. The novel is narrative; the play is action. The novel gains by repose: the playe loses with every relaxation of The novel addresses itself to mental perception and imagination the play appeals, first all, to the eyes. There never yet was made a play upon the basis of a novel that did not coniderably modify its original or depart from it altogether. For this reason lovers of the great novels of our language,-such as "Old Mortality, "Lorna Doone," etc.,-are in Esmond." variably disappointed when those books are filtered through the stage. In some cases the filtration is more skilfully done than in others, but in no case the play the same as the novel, and in no case does it produce the same effect. For the most part the result of this radically inartistic method of play-making is a hybrid,—neither play nor novel. partaking of the attributes of both, without possessng the unity, symmetry, and conclusive character

General Lew Wallace's novel of "Ben-Hur," well known for a long time, and far too familiar to require description, is not one of the great novels of Provish literature, but it has its specific character and its individual merit, and it has edified thou-sands of readers by its slow, mild, and kindly amaigamation of amatory interest and religious Its love-story, novel in tone if nothing being twined with association of the historic period of Christ and the Emperor Sejanus,-is per-All that individuality disappears its imagination, is the meeting of the three pilgrims who are led to their tryst by the Star in the That, no doubt, was prompted by a hint in the Cosnels and possibly also by the wonderfully imaginative prologue to Eugene Sue's novel,-once. many years ago, in everybody's hands of "The Wandering Jew." At all events, that is the chief maly, cannot be utilized in a theatre. Men may ome and men may go, as the poet Tennyson has chensively remarked, but the atmosphere of that weird, mysterious, and sublime night, when the shepherds were watching their flocks and the awful portent of revealed Divinity flamed in the wintry sky, can never be expressed by canvas and calciums. A glorified circular buzz-saw, in a mist of paint and gauze, is no adequate representation of the Star of Bethlehem.

Mr. William Young has made a spectacle play. neither better nor worse than various old semireligious dramas,-such as "The Christian Marthat flourished in the plous and thrifty days of Barnum's Museum. In a dramatic sense it is not comparable for even a moment with either "Sardanapalus" or "The Last Days of Pompell." On the other hand it excels in scenery The pictures quite overwhelm the action, and their dazzling opulence will amply suffice to hold the public favor. The Chariot Race alone would suffice to win the multitude. This was managed by the use of two cars, each drawn by three horses, each team being driven on a treadmill, and the two parallel treadmills with their spirited steeds in parallel treadmins with their spiritudes of a crowded colliseum, stretched over three sides of the stage and moved with the swiftness of light. The cheers for this splendid stage effect were long and loud and General Wallace, who was called before the curtain, briefly expressed his pleased acceptance of the public tribute.

There is not a single essentially dramatic situation in the piece, but several of its incidents are momentarily effective. An ocean of talk could be cut out of it, to great advantage. The story is that of the broken friendship between Ben Hur and Messaia, the escape of Ben Hur from the galleys, the rivalry of Messala and Ben Hur for the favor of the wanton Egyptian, the contest between these rivals in the arena, and Ben Hur's ultimate replied conversion from Judaism to Christianity. is a languid story and it has been languidly told. No attempt is made to develop character, and as no exacting situations are provided there is no special draft upon dramatic resource in the actors. Mr. E. J. Morgan, as Ben Hur, bore the burden of the piece, and bore it well. Mr. Henry Lee presented impressive image of senile decrepitude which yet could roar like twenty fog-horns. More had elocution has never, surely, been heard in one performance. Extended comment on the acting, how spectacle could not be doubted. W. W.

UNITED VERDE REORGANIZATION.

MINES. WORKS AND RAILROAD OF THE COMPANY TO BE SOLD AT AUC-TION ON DECEMBER 19.

The United Verde Copper Company, United States Senator William A. Clark president, has issued a notice to the effect that the mines, works and railroad of the company, situated at Jerome, Ariz., will be sold at public auction at the New-York Real Estate Salesroom, No. 111 Broadway, on Decem-

The United Verde company, which operates one of the richest copper mines in the United States, maintains an office in this city at No. 43 Cedar-st. None of its product is marketed here, and its only capital in New-York State is the balance it main-tains in a local bank. On this capital it willingly has paid for years a tax of about \$2,000 a year, said Henry G. Atwater, of Atwater & Cruikshank, counsel for the company, yesterday. Last year, however, the assessors laid a tax of \$35,000 on personal property of the company to the amount of a large part of this property, Mr. Atwater says, being in other States. The stockholders, feeling this tax to be unfair, decided to dissolve the company as a New-York corporation and to organize a new corporation under the laws of West Virginia with a capital of \$3,000,000, the same as at present, and the issue by the new corporation of present, and the issue by the new corporation of bonds to the amount of \$3,000,000, and the transfer of all the property of the company in exchange for such stock and bonds, which would then be divided up among the present stockholders pro rata. The plan of reorganization received the assent of 289,099 lhares out of the whole 300,000. One stockholder, however, holding about nine hundred shares, reliased to agree to the plan, on the alleged ground that it is a scheme to "freeze out" the minority holders, although, Mr. Atwater says, precisely the same terms were offered him as the other stockholders and he has begun an action to prevent the reorganization and to have the property turned over to a receiver and sold. It is in consequence of this stockholder's attitude. Mr. Atwater says, that a public sale of the property is to be held by the company. A committee of stockholder's has been formed to bid on the property at the sale for the benefit of all. This committee now represent \$25 per cent of all the stockholders of the company, and will be the purchasers at the sale unless some one else bids more than they think it is worth. company as a New-York corporation and to or-

CHAMBERLAIN AND RHODES.

AN ENGLISH CORRESPONDENT CONSID-ERS THEM THE WORST FOES OF THE OUTLANDERS.

NEVERTHELESS, HE HOLDS THAT ENGLAND'S VICTORY IN SOUTH AFRICA WILL MAKE FOR JUSTICE, AND THAT THE "EMPIRE

BUILDER" WILL BE RELEGAT-

ED TO THE REAR.

To the Editor of The Tribune. Sir: As an Englishman who has been to ing through the United States for the last six weeks, and who has consistently read The Tribune for daily news, I should like to express my gratitude for the valuable support you have given to our cause in the Transvaal. I should like also to suggest that the issues raised by such letters on the other side as I observe in to day's number are not necessarily final; sympathy with the British forces need not necessarily imply allegiance to Mr. Rhodes or to Mr.

For example, I myself regard Mr. Rhodes's policy as a pathetic anachronism-a survival of the days when empire makers were not trammelled by such petty obstacles as telegraph Though my sympathizers are mainly Conservative, I shall vote on the other side in the next election, merely because Mr. Chamberlain is a member of the present Ministry. Owing to his change of front in 1886, he has the adhesion of many honest citizens who credited him with disinterested and patriotic motives

Now, few of my American friends and acquaintances seem to have conjectured the possibility of Messrs. Rhodes and Chamberlain being the worst enemies of the Outlanders, who are not, as a class, disposed to be Rhodesian henchmen. They were on the point of gaining some measure of enfranchisement in 1895, when Mr. Rhodes, wishing to shed a Rhodesian glamour on the transaction, set the clock fifty years back by a clumsy raid. This might have been remedied by honest and courageous statesmen at home, had not Mr. Chamberlain proclaimed his code of political morality to the world by announcing that Mr. Rhodes's "personal honor" had been uninjured by the report of the South African Commission. Thus, the Boers can hardly be censured for not trusting in the good efficer of our negree party, though it is by no hardly be censured for not this time.

offices of our peace party, though it is by no means impossible that Lord Salisbury might not in the end have remeded the Colonial Secretary's diplomatic indiscretions.

On the other hand we, like the Parliamentar-

On the other hand we, like the Parliamentarians of 1640, had no securities for the maintenance of the pledged reforms; their establishment was to be conditiond by the renunciation of such guarantees. The war might conceivably have been avoided; but none would deny that the Boers had been preparing for it, and desired it sooner or later. Under these circumstances, how should it be regarded by the patriotic Britisher and by the American well wisher? In 1898 many Englishmen felt that your war with Spain might have been avoided by an ideal diplomacy, as ours might have been now. But history is assuredly a great "pis aller." Human justice is a no less rough and ready device between as ours might have been now. But history is assuredly a great "pis aller." Human justice is a no less rough and ready device between States than between individuals. Broadly considered, your war of 1898 made for justice, broadly considered, our war makes for justice, even if the Transvaal were regarded as a sovereign independent State. When the war is over Mr. Chamberlain will have to account for his stewardship to the country, and the Imperial settlement of South African affairs will leave scope for the buccaneering energies of Mr. ess scope for the buccaneering energies of Mr.

these grounds I appeal to your readers. On these grounds I appeal to your readers. Are they really convinced that the British cause in South Africa is as inlquitous as it is (unhapplly) unplausible, that the Rhodesians are the best friends and not the worst foes of the Outlanders, and that the hard won success of the British arms will not ultimately achieve a true democracy based on freedom, order and real equality before the law?

WHAT WE OWE TO MARK HANNA. DOESN'T SYMPATHIZE WITH THE CLEVELAND ANTI-BOSS REPUBLICAN VOTERS

To the Editor of The Tribune. Sir: If I am not mistaken, we owe to Mr. Hanna, the sage, under God's good providence, the nomination and pler ever sat in the Presidential chair. What sort of a spectacle would it be if the evident wish of your Ohio correspondent was gratified, and Mr. McKin. ley refused to recognize Mr. Hanna? For one, I thank God for Mark Hanna, and if there is any good reason why his sagacity and his splens work in the last National campaign should not appreciated and properly recognized by both peof and President, I would like to know it. Respendingly yours.

IRISHMEN IN THE BRITISH ARMY.

To the Editor of The Tribune. Sir: Myself and some friends have had a little argument as to the number of Irish there is serving in the British Arn.y. As we know The Tribune is generally very accurate in its statements, would be much pleased if you wiuld kindly stathrough your columns what you think is through your columns what you think is through your columns who wear the Queen uniform. Syracuse, N. Y., Nov. 19, 1899.

ish Army 158,566 men of English birth, 26,374 of Irish birth and 16,485 of Scotch birth. Among the territorial regiments of the line there are seven Irish regiments, to wit: The Connaught Rangers, the Royal Dublin Fusiliers, the Royal Inniskilling Fusiliers, the Royal Irish Fusiliers, the Royal Irish Regiment, the Royal Irish Rifles and the Royal Munster Fusiliers. Some of the most distinguished officers of the British Army are also of Irish birth. Many of the soldiers enumerated above are now serving in South Africa, and are they who, according to Miss Maud Gonne, Mr. William Redmond, Mr. T. D. Sullivan and other eminent Irish leaders, have thus brought disgrace upon Ireland.-Ed.]

To the Editor of The Tribune. The Secretary of the Navy wisely recon mends the expenditure of millions for new ships, and all indications promise the approval of C gress and the people. It is of greater importance however, also to insure the continuance and deveopment of "the man behind the gun" by preserving for his education and inspiration trophies and rec ords of men and ships, from John Paul Jones and Decatur to Farragut and Dewey; from the Bon Homme Richard and the Constitution to the Hart-

can Navy.

The Constitution, "Old Ironsides," restored to her original condition and preserved at Washington, D. C., as the National naval museum, would make a matchless memorial and receptacle for our glorious naval history. In the effort to accomplish the preservation of "Old Ironsides" as the National naval museum not one whole hearted, disinterested objection has been raised, but from all over America Navy men and patriotic people, from school children up to the press, hall the suggestion and expect the coming Congress to enact the law which two generations have urged and all coming generations will appland.

There is no financial or petriotic reason why "Old Ironsides" should not be ordered rebuilt and installed at Washington as the National navimuseum by this Congress as a tribute to it matchless American Navy, man and ship.

An American may have been born anywhere, but having chosen American citizenship, he becomes a part of the vitality which is making civilization and manhood, and the American Navy is his greatest protection. The Nation should rebuild "Old Ironsides."

The Board of Governors of the Automobile Club of America has taken permanent headquarters at the Waldorf-Astoria. A suite of rooms near those occupied by the Ohio Society have been secured, and will be occupied until plans for a permanent clubhouse can be perfected. No motor house will be obtained at present, as plans for storing motors at various points in the city have been arranged for. The club has got permission to use Astor Court, which is a private driveway, from which hansoms and other vehicles are excluded. This will give the club an exclusive entrance to the hotel. A complimentary letter has been received from the French Automobile Club, and it contained an invitation for any member of the local club to visit the French club while in Paris.

Whether or not he would accept the call in the event of one being offered to him must necessarily for the moment remain a question of doubt. Dr. Hall is at present a professor in the Union Theological Seminary at a salary of \$5.000, but a friend who is close to him said yesterday that he thought Dr. Hall would not be unwilling to reenter upon ministerial duties. Soon after the death of his father, some of the members of the Fifth Avenue Presbyterian Church advocated that he should be called to succeed his father, but the majority of the congregation realized that this was impossible. In view of the fact that Dr. Hall's advanced and liberal theological views were greatly at variance with the unswervingly orthodox and conservative spirit of the Fifth Avenue Church. The stipend given to the retiring pastor of the Rutgers Presbyterian Church is \$8,000 a year. the congregation are already urging the choice

OBITUARY.

JUSTICE JOHN R. PUTNAM

Saratoga, N. Y., Nov. 29 (Special).-Justice John R. Putnam, of this place, a member of the Appellate Division of the Third Judicial Department, died last night from the grip at Hong Kong. Justice, accompanied by Mrs. Putnam, left home late in October, and on November 1 sailed for Manila, where they expected to pass Thanksgiving Day with their son, Lieutenant Israel Putnam, of the 6th Infantry. Justice Putnam, who was almost seventy years old, was in impaired health when he sailed, but he hoped that the voyage would prove beneficial. Shortly after leaving San Francisco he had a renewal of the grip, from which he suffered severely last winter. When his steamer left Honolulu for Hong Kong and Manila his condition became serious. He continued to fail until the steamer reached Hong Kong, where he

until the steamer renched Hong Kong, where he passed away.

Justice Putnam was elected to the Supreme Court bench in 1887, and his term would have expired on December 31, 1890. In 1831 he was appointed by Governor Hill to the General Term of the Third Department. He continued in that position till the adoption of the late Constitution, when he was designated by Governor Morton as one of the Justices of the Appellate Division of the Third Department. He leaves a widow and three sons, including R. M. S. Putnam, of New-York City; John R. Putnam, fr., who is attached to the Imperial Maritime Customs at Hang-Chow, China, and Lieutenant Israel Putnam, of the 5th Infantry, stationed at Bajolod, Philippine Islands.

PET DOG SHOW OPENS.

EIGHT HUNDRED EXHIBITS BEGIN A NOIST RE-CEPTION OF VISITORS IN THE METRO-

The Metropolitan Opera House has been turned

over to the exhibition of nearly eight hundred pet dogs. The third annual bench show of the Ameri-Pet Dog Club began there yesterday, and the vening was most encouraging to its managers.

The dogs were well benched, although the aisles owing to the large number of entries, are some what narrower than they should be for the com fort of spectators. The exhibition is considered to be one of the best ever given by the club. There are many fine collies, especially those from J. Pierpont Morgan's kennels; a good exhibit sporting spaniels, beagles, bulldogs, bull terri Maltese terriers, Yorkshire terriers, pugs, Itanan greyhounds, French bulldogs, Skye terriers, anese spaniels, Prince Charles spaniels, King Charles Spaniels, Blenheim spaniels, and a single black pug, owned by Mrs. Howard Gould. This

THE PASSING THRONG.

"The beet sugar industry promises to develop into a great and widespread business." said H. Rogers Salmon, of Milwaukee, at the Hotel Imperial yesterday. Salmon is not interested in the beet sugar industry, but is engaged in BEET INDUSTRY. handling various large tracts of country land, and so this industry

came to his attention. "I have been astonished at the success of the undertaking," he continued. "About four years ago a company was organized in Milwaukee and the business started. They went about twelve miles out of the city, and took a piece of property and put up works. An engineer and expert from Germany was brought here to put up the machinery and put in the plant. In the four years they have doubled their capacity, and are now contemplating another addition. The business is an interesting one. When the company first started in they could not induce farmers to grow the beets for them. They had to send to Germany and get the seed, give it to the farmer and give him a guarantee before he would bother with it. Last year they got enough beets within a radius of one hundred miles to keep the milli going, and so marvellously has the acreage increased that they do not expect to nave to go further than fifty miles for beets this year. The system of getting sugar is odd. The farmer drives in with his beets, and they are turned over to be cleaned. Then they are cut into fine, thin straws and crushed. The molasses crushed out is allowed to run down a pipe into a vat. The waste, after the fulce is thrown out, is eagerly gobbled up by the farmers, who say it makes excellent fodder. Then this molasses is whirled around at a terrific rate in one of those centrifugal machines. The sugar adheres to the machine and the rest is thrown off. It is queer to see the dry, white sugar come out of the sticky, dirry looking mass that goes in. This stuff that is thrown off is kept, and can be used over again, and still a great deal of sugar is found to have remained. This is a poorer grade of sugar, but sells readily. The farmer gets his fair shire of the money derived from the sugar made from his beets, and he has found that the beets pay far better than any other thing he could put in. All of the sugar turned out by this mill—I believe it is about three hundred barrels a day—is used in and around Milwaukee. It sells for the same as other sugar, but the people seem to like it better. I think the industry will grow to enormous proportions." the beets for them. They had to send to Germany

awyer and a lifelong Democrat, who is now in this city, says that he thinks Mr. Bryan will be nominated for the Presi-dency next year, but he added: "I BRYAN do not think that he can be elected. CAN'T BE His chances are more remote than they were in 1896. He leads a forlorn hope. The general prosperity of the country has done much to dispel the haziness that sur-rounded the question of free silver. There is a

J. C. Bradford, of Nashville, Tenn., a prominent

strong sentiment throughout the South for a permanent settlement of the currency question. The politicians and Bryan men are still shouting for free silver, but the majority of the people, and the thinking ones, are against silver. While the issues in the coming campaign are not clearly defined, still it seems that opposition to trusts and imperialism or expansion will be the acute question. Party leaders who follow Bryan are in the main opposed to the acquisition of the Philippines. I think that among the masses there is a strong and growing sentiment that we should retain the Philippines. They would give us a foothold in the East, a chance to find out what is going on there and an opportunity to extend our commerce. The construction of the Nicaragua Canal will give us further advantages to carry cotton and other commodities to Eastern countries. I think the best peomodities to Eastern countries. I think the best peomodities to Eastern countries. strong sentiment throughout the South for a perther advantages to carry cotton and other com-modities to Eastern countries. I think the best peo-ple of the South come to realize more and more that their business interests are more closely allied to those of the East than to the West, and I be-lieve such as allies with
